

A & N ELECTRIC COOPERATIVE
Tasley, Virginia

**RIDER "AST EFT"
ENERGY FOR TOMORROW**

AVAILABILITY

As of May 1, 1996, this Rider is closed to new locations where load management equipment is not currently installed.

This Rider is available where service is provided to eligible residential dwellings under Schedules "AST R"; "AST R-TOU-ND"; "AST SGS-S"; "AST LGS-S"; and "AST GS-P" regardless of the Customer's electricity supplier. By participating in this plan, the Customer and the Customer's Electricity Supplier agree to allow the Cooperative to cycle off and on the Customer's electrical central air conditioner/heat pump or water heater, or both, during the times in which the demand for electricity on the Cooperative's system is anticipated to be high or as required to mitigate a system emergency, or for economic purposes.

When the dwelling served is not owned by the Customer, participation in this program is conditioned upon agreement of both the owner of the dwelling, or owner's agent, and the Customer.

Availability is subject to the economic and technical feasibility of the installation of required Cooperative equipment. All of Customer's like appliances must be connected to Cooperative's cycling equipment to qualify for this Rider.

PAYMENTS FOR PARTICIPATING

Each participating Customer shall be paid by the Cooperative, regardless of the Customer's Electricity Supplier, the amounts stated below for each option the Customer selects. Only one credit per household for each option selected shall be paid to the Customer for the months specified below. Payment shall be a separate credit on the Customer's regular monthly electric bill, before applicable taxes, and shall not reduce Customer's monthly electric bill below the Minimum Monthly Charge found on the applicable rate schedule:

<u>Option Selected</u>	<u>Monthly Credit</u>	<u>Months Credit is Paid to Customer</u>
Air Conditioning	\$4.92	June, July, August & September
Water Heating	\$2.95	June, July, August & September

CUSTOMER OPTIONS AVAILABLE & ELIGIBILITY CRITERIA

A participating Customer may select any one of the following three options:

Option 1 - Air Conditioner Cycling

This option is available to any Customer who has an electric central air conditioner or heat pump with an air conditioning cycle.

Option 2 - Water Heater Cycling

This option is available to any Customer who has an electric water heater of at least 40 gallons capacity.

Option 3 - Both Air Conditioner and Water Heater Cycling

This option is available to any Customer who qualifies for both Options 1 and 2.

CYCLING PERIODS

Air Conditioners

Under this option, the Cooperative may cycle off and on the Customer's central air conditioner only on weekdays and normally during the summer season of June 1 through September 30.

The air conditioner may be "cycled off" for up to 15 minutes out of every 30 minute period normally between the on-peak hours of 9 a.m. and 10 p.m. on any weekday. The number of weekdays in which cycling may occur shall be limited to not more than 30 weekdays during the June 1 to September 30 summer season.

In addition, the air conditioner may be "cycled off" for up to 15 minutes out of every 30 minutes during all periods throughout the year as may be required to mitigate a system emergency.

Water Heaters

Under this option, the Cooperative may cycle off and on the Customer's electric water heater normally on weekdays and normally during the summer season of June 1 through September 30.

The water heater may be "cycled off" up to 8 on-peak hours between 6:00 a.m. and 10:00 p.m. on any weekday. The number of weekdays in which cycling may occur shall be limited to not more than 60 weekdays.

In addition, the water heater may be "cycled off" for up to 8 hours out of every 24 hours during all periods throughout the year as may be required to mitigate a system emergency.

CYCLING EQUIPMENT

The Customer's air conditioner and/or water heater, depending upon the option selected by the Customer, shall be "cycled off" and then "cycled on" by means of a signal transmitted by the Cooperative to a receiver installed at the Customer's residence. The Customer will allow the Cooperative to install, own and maintain the equipment required for the purpose of the Cooperative cycling off and on operation of those appliances as described herein. Such equipment shall be installed by the Cooperative at no direct cost to the Customer.
